

American Dental Association  
150th Annual Session  
September 30-October 4, 2009

**Daily Highlights: Wednesday, September 30, 2009**

**Opening General Session and Distinguished Speaker Series: Sidney Poitier**

Time: 5:30 – 7:30p.m. Where: Waikiki Shell

The ADA's Opening General Session features Sidney Poitier, the 2009 Distinguished Speaker. Poitier, who was awarded the Presidential Medal of Freedom in August, is an Academy Award-winning actor. He also is a writer, director, and diplomat (Bahamas' ambassador to Japan and UNESCO). He has been a political and artistic trailblazer for more than half a century. *The Distinguished Speaker Series has been underwritten in part by the ADA Foundation through a donation from Johnson & Johnson Healthcare Products Division of McNEIL-PPC, Inc.*

**Daily Highlights: Thursday, October 1, 2009**

**ADA World Marketplace Exhibition ,Open From 7:30 a.m. – 3:30 p.m.**

Thursday, Oct. 16 through Saturday, Oct. 18 – Held in the Hawaii Convention Center, it consists of more than 350 exhibitors, occupying over 200,000 square feet of exhibition space

**Education in the Round**

Live-patient procedures in a fully functional dental operator, with an interactive format that takes you step-by-step from diagnosis to treatment.

**Create Success in Providing Periodontal Treatment**

Time: 7:30 – 10:30 a.m. Course Code: 5401

***Samuel Low, DDS, MS, Med***

Leave behind traditional therapies and move into the technology era of providing periodontal care where success is the outcome. Through team interaction and utilizing effective systems including anti-inflammatory modalities, periodontitis can be controlled.

**Crown Lengthening for Restorative Dentistry**

Noon – 3 p.m. Course Code: 5402

***Jon Suzuki, DDS, MBA, PhD***

This live patient demonstration will begin with treatment planning as a requisite for periodontal crown lengthening surgery. Instrumentation will be described for incision making, flap reflection, osseous reduction (if necessary), and flap closure.

**New Science on the Links Between Oral Diseases and Systemic Disorders**

Time: 7:30 – 10:00 a.m. Course Code: 5324

***Daniel Fine, DMD, Denis Kinane, BDS, PhD and Panos Papapanou, DDS, PhD***

This course will introduce new scientific information on the link between periodontal diseases and systemic disorders. Attendees will be exposed to new evidence behind the inflammatory and microbiological profile of individuals at risk of developing systemic disorders. *Underwritten by a grant from Johnson & Johnson Healthcare Products Division of McNEIL-PPC, Inc.*

## **Bisphosphonate-related Osteonecrosis of the Jaw: Update on Diagnosis and Management**

Time: 8:00 a.m. – 10:30 a.m. Course Code: 5119

*Salvatore Ruggiero, DMD, MD*

Dr. Ruggiero will review the indications for bisphosphonate therapy and the rationale for its widespread use. The details of how this new disease entity was discovered will be examined along with the current guidelines for diagnosis and management. *This course is underwritten by a grant from the American Dental Association Association of Oral and Maxillofacial Surgeons.*

## **Closing the Information Gap with the ADA Professional Product Review**

Time: 11:00 a.m. – 12:30 p.m. Course Code: 5326

*Paul Feuerstein, DMD, Michael Rethman, DDS and David Sarrett, DMD, MS*

This course helps cut through the confusion surrounding new products and product claims. Discover how product evaluations are conducted and examine some of the laboratory and clinical results published in the *ADA Professional Product Review*.

The doctors guide you through product education, understanding clinical relevance versus product selection and what peers think about products included in their presentation.

## **The Oral Cavity: Gateway to Health or Disease?**

Time: Noon – 2:30 p.m. Course Code: 5325

*Charles Carpenter, MD, MPH and William Carpenter, DMD*

Dentistry and medicine recognize patient care must be more comprehensive and collaborative. Join Drs. Charles Carpenter and William Carpenter as they explore the current state of evidence about the oral systemic association . They say to provide the best patient care, there must be understanding of global interconnections that exist throughout the body, incorporate them into treatment planning and communicate relationships to patients. *This course is underwritten by a grant from the Colgate-Palmolive Company.*

###

## American Dental Association

150th Annual Session  
September 30-October 4, 2009

### **Daily Highlights: Friday, October 2, 2009**

#### **ADA World Marketplace Exhibition, Open From 7:30 a.m. – 3:30 p.m.**

Thursday, Oct. 1 through Saturday, Oct. 3 – Held in the Hawaii Convention Center, it consists of more than 350 exhibitors, occupying over 200,000 square feet of exhibition space.

#### ***ADA 2010 - Orlando***

**Registration is open Thursday through Sunday morning for the 2010 Annual Session in Orlando, Florida, Oct. 9-12.**

#### **Education in the Round**

Live-patient procedures in a fully functional dental operator, with an interactive format that takes you step-by-step from diagnosis to treatment.

##### **Implants for the Terminal Dentition: Yes, You Can Do It!**

**Time: 7:30 – 10:30 a.m. Course Code: 6401**

##### ***Steve Ratcliff, DDS, MS and Jorge Ramirez, DMD***

Most general practices have patients who would like to avoid wearing dentures. This course will demonstrate a technique for restoring a terminal dentition with immediately loaded long-term “provisional” restorations, designed to lower costs of implant therapy.

##### **A Simplified Yet Accurate Impression Technique When Splinting Multiple Implants**

**Time: Noon to 3 p.m. Course Code: 6402**

##### ***Lee Ann Brady, DMD and Peter Fay, DMS***

In this live-patient demonstrations, Drs. Brady and Fay will show a technique for creating very accurate implant fixture level or abutment level impressions that lead to precise models, upon which exceptional frameworks can be created without solder transfers.

#### **Prevention for the High-Risk Caries Patient**

**Time: 8:00 a.m. – 10:30 a.m. Course Code: 6124**

##### ***Randy Huffines, DDS***

Understanding of the caries process is now more sophisticated and we know that our simple instructions to just brush and floss are not adequate for many adults at high risk. Learn practical tips to quickly assess and manage caries for difficult patients in your practice.

*This course is underwritten by a grant from 3M ESPE Preventive Care.*

#### **State-of-the-Art Caries Detection and Restoration**

**Time 11:30 a.m. – 2:00 p.m. Course Code: 6318**

##### ***John Flucke, DDS***

Learn how caries diagnosis and detection is changing through the use of high-tech devices that allow fast and reliable decision making. Dr. Flucke will review multiple ways to detect, monitor and ultra-conservatively restore these situations.

## The Current Status of Pain Control in Dentistry

Noon – 2:30 p.m. Course Code: 6112

*J. Mel Hawkins, DDS, BScD Stanley Malamed, DDS*

Drs. Malamed and Hawkins, together for the first time, will present an interactive discussion of the current status of pain control in dentistry. This program will look at drugs, technique and pharmacology of local anesthesia: what's "hot" and what's "not."

### **Experience Aloha! The ADA's "An Evening Under the Stars"**

Time: 7:30 – 9:30 PM Where: Waikiki Shell

The Waikiki Shell will be transformed into a showplace for Polynesian culture, crafts and entertainment for an ADA exclusive special event, "An Evening Under the Stars." Attendees will experience the heritage of seven South Pacific islands as they learn hula dancing, play musical instruments, make crafts including a floral lei, and more. A stunning stage spectacular follows, featuring more than 100 performers. A custom song honoring the ADA's 150<sup>th</sup> anniversary will conclude the evening and will be available for download after annual session, beginning October 7.

###

## American Dental Association

150th Annual Session  
September 30-October 4, 2009

### **Daily Highlights: Saturday, October 3, 2008**

#### **Last Day for ADA World Marketplace Exhibition, Open From 7:30 a.m. – 3:30 p.m.**

Held in the Hawaii Convention Center, it consists of more than 350 exhibitors, occupying over 200,000 square feet of exhibition space.

#### **Education in the Round**

Live-patient procedures in a fully functional dental operatory, with an interactive format that takes you step-by-step from diagnosis to treatment.

##### **TMD Treatment 2009: What Works, What Doesn't and Why**

Time: 7:30 - 10:00 a.m. Course Code: 7401

##### ***Terry Tanaka, DDS***

This course will provide the essential skills required for diagnosing and managing patients with muscle and joint disorders (TMDs). New "Stretch and Spray" and practical "Splint Adjustment" techniques will be presented in this demonstration.

##### **Solving Anterior Esthetic Restorative Challenges with Composite Resin**

Time: Noon - 3 p.m. Course Code: 7402

##### ***Wynn Okuda, DMD***

Patients want less invasive, highly esthetic dentistry. With minimal invasive dentistry, both can be achieved. Appropriate materials and techniques help to solve anterior esthetic challenges. This live patient presentation showcases a proper Class IV resin

#### **Fluoride: What Type? How Much? How Often**

Time: 8:30 – 11a.m. Course Code: 7329

##### ***Julie Frantsve-Hawley, PhD, RDH and Jane McGinley, MBA ,RDH***

This course discusses the ADA's evidence-based recommendations on the use of fluoride and provides an update on community water fluoridation.

#### **Dentistry in the Virtual World: No More Plaster, No More Impressions**

Time: 11:30 a.m. – 2:00 p.m. Course Code: 7112

##### ***Steve Ratcliff, DDS, MS***

Dentistry is headed into the most exciting technological adventure it has ever seen. Learn what is on the horizon. What if you never had to make another impression again? What if you never had to see another stone model or pay for a diagnostic wax up? Visualize how computer-aided diagnostics and computer-designed restorations work.

#### **Using Technology in Treatment From Beginning to End and Everywhere in Between**

Time: Noon – 2:30 p.m. Course Code: 7320

##### ***John Flucke, DDS***

As technology continues to permeate all aspects of dentistry, practitioners need to keep up with the constantly changing landscape. Dr. Flucke will discuss high-end and affordable devices, as well as strategies that can help any office along the path to "tech heaven."

## **A Snapshot of Street Drug and Prescription Drug Abuse and Its Impact on Your Practice**

Time: 11:30 a.m. – 2:30 p.m. Course Code: 7318

*Hal Crossley, DDS, PhD*

This dynamic presentation will help you identify the substance abusing patient. Discussion includes the signs and symptoms of commonly abused prescription and illicit drugs. This course should be attended by all dentists and dental team members.

###

## American Dental Association

150th Annual Session  
September 30-October 4, 2009

### **Daily Highlights: Sunday, October 4, 2008**

#### **Prevention and Diagnosis of Oral Cancer: Current Realities and Future Possibilities**

Time: 8 – 10:30 a.m. Course Code: 8311

*Karen Crews, DMD, Mark Lingen, DDS, PhD and David Wong, DMD, DMSc*

This course will emphasize the critical role of dental health care professionals in the detection (including use of saliva diagnostic toolboxes) and prevention of oral cancer and provide a review of oral cancer risk factors, as well as an understanding of required techniques for performing a complete exam.

#### **Is Your Office Bisphosphonate Ready?**

Time: 8 – 10:30 a.m. Course Code: 8302

*Susan Calderbank, DMD*

A significant group of patients have been experiencing necrosis of the jaws. Join Dr. Calderbank and become informed about this side effect? Guidelines based on current FDA and ADA information will safeguard your patients. Become bisphosphonate ready!

#### **Methamphetamine and Other Current Drug Trends: What's Cookin' in Your Office?**

Time: 8 – 10:30 a.m. Course Code: 8305

*Patrick Sammon, PhD*

Meth abuse, meth mouth in teens, high-octane marijuana use, underage drinking and inhalant use impact dental practice. Dental teams can play a huge role in drug abuse prevention. Learn how to identify patients for drug use and give prevention messages.

#### **The Current Status of Pain Control in Dentistry**

7:30 – 10 a.m. Course Code: 8101

*J. Mel Hawkins, DDS, BScD Stanley Malamed, DDS*

Drs. Malamed and Hawkins, together for the first time, will present an interactive discussion of the current status of pain control in dentistry. This program will look at drugs, technique and pharmacology of local anesthesia: what's "hot" and what's "not."
