The Journal of the American Dental Association

Published monthly, this premier journal in dentistry contains peer-reviewed editorial on the latest developments in practice and research. Today's JADA continues to offer a wide range of information. Readers benefit from:

- Clinical information in such areas as biomaterials, pharmacology, and cosmetic and esthetic dentistry, as well as general dental practice

Such advertising must be factual, dignified, tasteful and intended to provide useful product and service information. These standards apply to all product-specific promotional material submitted to ADA programs. The publication of an advertisement is not to be construed as an endorsement or approval by the ADA or any of its subsidiaries, councils, commissions or agencies of the product or service being offered in the advertisement unless the advertisement specifically includes an authorized statement that such approval or endorsement has been granted. The fact that an advertisement for a product, service or company has appeared in an ADA publication will not be referred to in collateral advertising.

The ADA reserves the right to accept or reject advertising at its sole discretion for any product or service submitted for publication.

General Requirements

The ADA reserves the right to decline advertising for any product involved with a government agency challenge or denial of product marketing, and for any technique or product that is the subject of an unfavorable or cautionary report by an agency of the ADA.

5) By submitting advertising copy, advertisers certify that such copy and the advertised product(s) are in accord with applicable government laws and regulations such as equal opportunity laws and regulations covering new drug applications and prescription drug advertising. For example, products that require approval by the U.S. Food and Drug Administration for marketing must receive this approval before being eligible and must include “full disclosure” when required. It is the responsibility of the advertiser to conform to regulations of the FDA and all legal requirements for the content of claims made for products. Acceptance of advertising in ADA publications is not to be construed as a guarantee that the manufacturer has complied with such laws and regulations.

6) Complete scientific and technical data, whether published or unpublished, concerning product safety, operation and usefulness will be required.

7) The advertisement may cite, in footnotes, references from dental and other scientific literature provided the reference is truthful and is a fair and accurate representation of the body of literature supporting the claim made.

14) Advertising that Simulates editorial content must be clearly identified as advertising. The word “advertisement” must be displayed prominently.

15) Guarantees may be used in advertisements provided the statements that are “guaranteed” are truthful and can be substantiated. However, no guarantee should be used without disclosing its conditions and limitations. When space or time restrictions preclude such disclosures, the advertisement must clearly reveal where the full text of the guarantee can be examined before purchase.
