

## **Dental Waste Recycler Directory**

This directory has been compiled from information supplied by companies. It is provided solely for general information and should not substitute for a dentist's own evaluation of a prospective recycler.

Before recovering waste, contact the recycler and confirm information such as service area and cost. Determine whether they accept the type of waste you are trying to recycle and ask about any handling instructions. It is important to select a recycler that complies with all applicable federal and state laws, and provides adequate indemnification for its acts and omissions.

Before you sign a contract, review the contract to understand whether you can terminate the service at any time, or you are locked in to a contract for a specific time-period, or would be agreeing that the term of the agreement will automatically renew (see <http://success.ada.org/en/practice/operations/efficient-systems/contractual-auto-renew> for some of the concerns with an agreement that automatically renews). Check the contract carefully to determine your rights to terminate the service when you want, and pay particular attention to any early termination penalty (often termed in the agreement as “liquidated damages”). Better yet, have your attorney review any contract before you enter into it.

A listing in this directory does not indicate an endorsement by the American Dental Association (ADA) of the listed recycler, the accuracy of the information in a recycler’s listing or the recycler’s services or products. The ADA provides no guarantees or warranties for the recyclers and/or their services as listed in this directory.

The information in this directory is current as of October 2015. Users who become aware of any updates can send new information to [science@ada.org](mailto:science@ada.org) or can fax updates to 312/440-2536.

### **Questions You May Wish to Ask Your Recycler ...**

- Do your services include pick up of waste from dental offices in my area? If not, can waste be shipped to you?
- Do you provide packaging for storage, pick up or shipping of waste?
- If packaging is not provided, how should the waste be packaged?
- What types of waste can be packaged together?
- Do your procedures comply with ANSI/ADA Specification 109: Procedures for Storing Dental Amalgam Waste and Requirements for Amalgam Waste Storage/Shipment Containers?<sup>1</sup>

---

<sup>1</sup> American National Standard/American Dental Association Specification No. 109 - 2006. Procedures for storing dental amalgam waste and requirements for amalgam waste storage/shipment containers. Chicago: American Dental Association.

**ADA** American  
Dental  
Association®

- Do you accept whole filters from the vacuum pump for recycling?
- Do you pay for clean non-contact amalgam (scrap)?
- Is disinfection required for amalgam waste?
- Does your company have an EPA or applicable state license?
- Does the company use all of the proper forms required by the EPA and state agencies?
