Dental Hygiene III.....	16
Component B	16
Case Selection	16
Consultant Review	16

CRITERIA FOR DENTAL TEST CONSTRUCTORS

The Joint Commission selects consultants to serve on its Dental and Dental Hygiene Test Construction Teams (TCTs). To be considered, a person must possess appropriate qualifications and must submit a completed personal data form. Someone who has completed five years of service on a committee may be considered for reappointment to the same committee as TCT needs dictate.

The following are the criteria for test constructors on Anatomic Sciences, Biochemistry-Physiology, Microbiology-Pathology, Dental Materials, Pharmacology, Patient Management, and Testlet Development Teams:

- a. Dentist with a master's degree in that biomedical science OR a professional with a doctoral degree in that biomedical science.
- b. Three years of experience within the last five years teaching or in research in that biomedical science.

The following are the criteria for test constructors on Dental Anatomy and Occlusion, Operative Dentistry, Prosthodontics, Oral and Maxillofacial Surgery-Pain Control, Orthodontics-Pediatric Dentistry, Endodontics, Periodontics, and Oral Diagnosis Teams:

- a. Dentist
- b. In the case of special areas of dentistry, graduation from an accredited advanced education program in that specialty.

PART I (COMPONENT A) TEST CONSTRUCTION TEAMS

Anatomic Sciences

This team of five includes the following: At least one of the four subject-matter experts must be a dentist.

- a. Gross anatomists (2)
- b. Histologists (2); including one whose expertise is embryology and one whose expertise is neuroanatomy
- c. General dentist (1)

Biochemistry/Physiology

This team of five includes the following: At least one of the four subject-matter experts must be a dentist.

- a. Biochemists (2)
- b. Physiologists (2)
- c. General dentist (1)

Microbiology/Pathology

This team of five includes the following: At least one of the four subject-matter experts must be a dentist.

- a. Microbiologists (2); including one whose expertise is immunology
- b. Pathologists (2)
- c. General dentist (1)

Dental Anatomy and Occlusion

This team of four consists of 4 dentists who are:

- a. Dental anatomists (3)
- b. General dentist (1)

PART I (COMPONENT B) TEST CONSTRUCTION TEAMS

Testlet Development

This team of nine consists of:

- a. Dental educators representing the various discipline areas, and all of whom should already have served on a Part I discipline-based committee. (5)
- b. Dental practitioners representing each of the discipline-based Part I committees. (4)

Consultant Review

This team is responsible for reviewing the discipline-based (Component A) and testlet-based (Component B) components of the Comprehensive Part I examinations to ensure the examinations adhere to test specifications and item guidelines outlined by the Joint Commission. The composition of this team of two varies between the dental discipline experts and practitioners. Individuals serving on this team should have already have served on Component A.

PART II (COMPONENT A) TEST CONSTRUCTION TEAMS

Operative Dentistry

This team of five consists of:

- a. Restorative/operative dentists (3)
- b. Expert in dental materials (1)
- c. General dentist (1)

Pharmacology

This team of four consists of:

- a. Pharmacologists (3), one who is a dentist
- b. General dentist (1)

Prosthodontics

This team of six consists of:

- a. Prosthodontists (4), two with expertise in fixed prosthodontics and two with expertise in removable partial/complete prosthodontics
- b. Expert in dental materials (1)
- c. General dentist (1)

Oral and Maxillofacial Surgery/Pain Control

This team of four consists of:

- a. Oral and maxillofacial surgeons (3), at least one with expertise in pain control
- b. General dentist (1)

Orthodontics/Pediatric Dentistry

This team of six consists of:

- a. Orthodontists (3)
- b. Pediatric dentists (2)
- c. General dentist (1)

Endodontics

This team of four consists of:

- a. Endodontists (3)
- b. General dentist (1)

Periodontics

This team of four consists of:

- a. Periodontists (3)
- b. General dentist (1)

Oral Diagnosis

This team of six consists of:

- a. Oral pathologists (2)
- b. Oral and maxillofacial radiologists (2)
- c. Dentist with advanced education in oral diagnosis (1)
- d. General dentist (1)

Patient Management

This team of eight consists of:

- a. Dental public health specialists (2)
- b. Dentist with advanced education in special needs (1)
- c. Behavioral scientists (3), at least one of whom must be a dentist
- d. General dentist (1)

General Dentist

A full-time or part-time practitioner or clinician/scientist with at least five years of experience, who is in practice at least 20 hours per week, inclusive of clinical teaching, and is currently licensed as a dentist in the United States.

PART II (COMPONENT B) TEST CONSTRUCTION TEAM

Component B

This team develops the case-based items for the Comprehensive Part II examination. This team of 13 consists of:

- a. Individuals representing the dental disciplines, all of whom have served on Part II Component A (10)
- b. General practitioners with experience in preparing educational or licensure examinations (2)
- c. Behavioral scientist (1)

Case Selection

As an adjunct to the Component B team, the Case Selection team does the preliminary work of screening new patient cases and identifying suitable cases. This team drafts and reviews the patient histories, dental charts, and treatment plans associated with the cases. The composition of this team of four varies between dental discipline experts and practitioners.

Consultant Review

This team is responsible for reviewing the discipline-based (Component A) and case-based (Component B) components of the Comprehensive Part II examinations to ensure the examinations adhere to test specifications and item guidelines outlined by the Joint Commission. The composition of this team of two varies between the dental discipline experts and practitioners. Individuals on this team should already have served on Component A.

INTEGRATED NATIONAL BOARD DENTAL EXAMINATION (INBDE) TEST CONSTRUCTION TEAMS (TCTs)

INBDE test construction efforts involve the following TCTs:

- Case Development
- Item Writing and Review
- Clinical Relevance Review
- Form Review

Additional TCTs may also be created on an ad hoc basis to meet targeted needs for this examination program.

The following are considered highly desirable characteristics of INBDE Test Constructors (TCs):

- ability to be flexible and adaptable
- range of knowledge and skills
- ability to work with different groups
- intellectual curiosity and openness
- writing and communication skills
- expressed interest and enthusiasm for the role

The following definition of **General Dentist** applies to INBDE TCs:

A full-time or part-time practitioner or clinician/scientist with at least five years of experience, who is in practice at least 20 hours per week, inclusive of clinical teaching, and is currently licensed as a dentist in the United States.

A focal role for all General Dentists in the test development process is to help ensure that all INBDE items evaluate clinically relevant concepts encountered by practicing dentists, and concepts that MUST be correctly understood in order to practice dentistry safely.

The text that follows provides information concerning the focal tasks for each TCT, and corresponding TC requirements. The following summary of Foundation Knowledge areas is provided as a reference:

- FK1: Molecular, biochemical, cellular, and systems-level development, structure and function
- FK2: Physics and chemistry to explain normal biology and pathobiology
- FK3: Physics and chemistry to explain the characteristics and use of technologies and materials
- FK4: Principles of genetic, congenital and developmental diseases and conditions and their clinical features to understand patient risk
- FK5: Cellular and molecular bases of immune and non-immune host defense mechanism.
- FK6: General and disease-specific pathology to assess patient risk
- FK7: The biology of microorganisms in physiology and pathology
- FK8: Pharmacology
- FK9: Behavioral sciences, ethics, and jurisprudence
- FK10: Research methodology and analysis, informatics skills

Item Writing and Review

Sixteen (16) TCs participate in each Item Writing and Review TCT, and—depending upon JCNDE item development needs—multiple TCTs may be formed. Each TCT is responsible for item development and reviewing newly written items to ensure accuracy, currency, validity, adherence to the test specifications and item guidelines outlined by the Joint Commission. Each TCT is comprised of three smaller item development working groups consisting of individuals with expertise in specific Clinical Content Sections of the Joint Commission’s Domain of Dentistry.

Diagnosis and Treatment Planning (5 TCs)

This includes all aspects of diagnosis, assessment, interpretation of laboratory results, physical evaluation of structure, appearance and function, as well as background, characteristics, circumstances, underlying conditions and psychological, social or behavioral influences to derive an accurate diagnosis and treatment plan, as well as reasonable and safe treatment alternatives for any patient. Within the Joint Commission’s Domain of Dentistry, Diagnosis and Treatment Planning is represented by the tasks indicated below.

#	Diagnosis and Treatment Planning
1	Interpret patient information and medical data to assess and manage patients.
2	Identify the chief complaint and understand the contributing factors.
3	Perform head and neck and intraoral examinations, interpreting and evaluating the clinical findings.
4	Use clinical and epidemiological data to diagnose and establish a prognosis for dental abnormalities and pathology.
5	Recognize the normal range of clinical findings and distinguish significant deviations that require monitoring, treatment, or management.
6	Predict the most likely diagnostic result given available patient information.
7	Interpret diagnostic results to inform understanding of the patient’s condition.
8	Recognize the manifestations of systemic disease and how the disease and its management may affect the delivery of dental care.
9	Recognize the interrelationship between oral health and systemic disease, and implement strategies for improving overall health.
10	Select the diagnostic tools most likely to establish or confirm the diagnosis.
11	Collect information from diverse sources (patient, guardian, patient records, allied staff, and other healthcare professionals) to make informed decisions.
12	Formulate a comprehensive diagnosis and treatment plan for patient management.
13	Discuss etiologies, treatment alternatives, and prognoses with patients so they are educated and can make informed decisions concerning the management of their care.
14	Understand how patient attributes (e.g., gender, age, race, ethnicity, and special needs), social background and values influence the provision of oral health care at all stages of life.
15	Interact and communicate with patients using psychological, social, and behavioral principles.

The Diagnosis and Treatment Planning item development working group consists of the following:

- (1) General Dentist
- (1) FK1 Subject Matter Expert
- (1) FK4 Subject Matter Expert

- (1) FK6 Subject Matter Expert
 - (1) FK7 Subject Matter Expert
- Additional preferred areas of expertise include:
FK2, FK5, and FK8

Oral Health Management Section (6 TCs)

This includes all aspects of patient care delivery, including provision and modification of treatment, handling of complications, intervention outcomes assessment, and all developments that arise in the course of managing a patient's oral health care. Within the Joint Commission's Domain of Dentistry, Oral Health Management is represented by the tasks indicated below.

#	Oral Health Management
16	Prevent, recognize and manage medical emergencies (e.g., cardiac arrest).
17	Prevent, recognize and manage dental emergencies.
18	Recognize and manage acute pain, hemorrhage, trauma, and infection of the orofacial complex.
19	Prevent, diagnose and manage pain during treatment.
20	Prevent, diagnose and manage pulpal and periradicular diseases.
21	Prevent, diagnose and manage caries.
22	Prevent, diagnose and manage periodontal diseases.
23	Prevent, diagnose and manage oral mucosal and osseous diseases.
24	Recognize, manage and report patient abuse and neglect.
25	Recognize and manage substance abuse.
26	Select and administer or prescribe pharmacological agents in the treatment of dental patients.
27	Anticipate, prevent, and manage complications arising from the use of therapeutic and pharmacological agents in patient care.
28	Diagnose endodontic conditions and perform endodontic procedures.
29	Diagnose and manage the restorative needs of edentulous and partially edentulous patients.
30	Restore tooth function, structure, and esthetics by replacing missing and defective tooth structure, while promoting soft and hard tissue health.
31	Perform prosthetic restorations (fixed or removable) and implant procedures for edentulous and partially edentulous patients.
32	Diagnose and manage oral surgical treatment needs.
33	Perform oral surgical procedures.
34	Prevent, diagnose and manage developmental or acquired occlusal problems.
35	Prevent, diagnose and manage temporomandibular disorders.
36	Diagnose and manage patients requiring modification of oral tissues to optimize form, function and esthetics.
37	Evaluate outcomes of comprehensive dental care.
38	Manage the oral esthetic needs of patients.

The Oral Health Management item development working group consists of the following:

- (1) General Dentist
- (1) FK1 Subject Matter Expert
- (1) FK2 Subject Matter Expert
- (1) FK3 Subject Matter Expert
- (1) FK5 Subject Matter Expert

(1) FK8 Subject Matter Expert
 Additional preferred areas of expertise include:
 FK4, FK6, and FK7

Practice and Profession Section (5 TCs)

This includes the understanding, implementation and monitoring of effective systems, procedures and policies that support professional practice integrity, quality control and self or organizational performance assessment, as well as systems, procedures and policies that enable skillful integration of new knowledge, products and technology, and that minimize risk and enhance the quality of care provided or improve community oral health. Within the Joint Commission's Domain of Dentistry, Practice and Profession is represented by the tasks indicated below.

#	Practice and Profession
39	Evaluate and integrate emerging trends in health care.
40	Evaluate social and economic trends and adapt to accommodate their impact on oral health care.
41	Evaluate scientific literature and integrate new knowledge and best research outcomes with patient values and other sources of information to make decisions about treatment.
42	Practice within the general dentist's scope of competence and consult with or refer to professional colleagues when indicated.
43	Evaluate and utilize available and emerging resources (e.g., laboratory and clinical resources, information technology) to facilitate patient care, practice management, and professional development.
44	Conduct practice activities in a manner that manages risk and is consistent with jurisprudence and ethical requirements in dentistry and healthcare.
45	Recognize and respond to situations involving ethical and jurisprudence considerations.
46	Maintain patient records in accordance with jurisprudence and ethical requirements.
47	Conduct practice related business activities and financial operations in accordance with sound business practices and jurisprudence (e.g., OSHA and HIPAA).
48	Develop a catastrophe preparedness plan for the dental practice.
49	Manage, coordinate and supervise the activity of allied dental health personnel.
50	Assess one's personal level of skills and knowledge relative to dental practice.
51	Adhere to standard precautions for infection control for all clinical procedures.
52	Use prevention, intervention, and patient education strategies to maximize oral health.
53	Collaborate with dental team members and other health care professionals to promote health and manage disease in communities.
54	Evaluate and implement systems of oral health care management and delivery that will address the needs of patient populations served.
55	Apply quality assurance, assessment and improvement concepts to improve outcomes.
56	Communicate case design to laboratory technicians and evaluate the resultant restoration or prosthesis.

The Practice and Profession item development working group consists of the following:

(1) General Dentist

- (1) FK6 Subject Matter Expert
 - (1) FK9 Subject Matter Expert
 - (1) FK9 Subject Matter Expert
 - (1) FK10 Subject Matter Expert
- Additional preferred areas of expertise include:
FK4 and FK7

Foundation Knowledge: Among the above 15 TCs, 10 need to have advanced training and/or expertise in at least one (1) of each of the following Foundation Knowledge (FK) areas:

- FK1: Molecular, biochemical, cellular, and systems-level development, structure and function.
- FK2: Physics and chemistry to explain normal biology and pathobiology.
- FK3: Physics and chemistry to explain the characteristics and use of technologies and materials.
- FK4: Principles of genetic, congenital and developmental diseases and conditions and their clinical features to understand patient risk.
- FK5: Cellular and molecular bases of immune and non-immune host defense mechanisms.

- FK6: General and disease-specific pathology to assess patient risk. [Pathology]
- FK7: The biology of microorganisms in physiology and pathology.
- FK8: Pharmacology

FK9: Behavioral sciences, ethics, and jurisprudence
FK10: Research methodology and analysis, informatics skills.

*Additional volunteers may be selected if they meet the criteria, so that a TCT can be formed and selected based on availability for each meeting.

Case Development (5)

This TCT is responsible for reviewing images and case materials to identify clinically relevant scenarios and concepts that could serve as the basis for item development. This TCT consists of the following:

- (5) General Dentist with expertise across the three clinical content areas

Clinical Relevance Review (5)

This TCT selects INBDE items that will be eligible to appear on INBDE forms, and can help in making preliminary assignments of items to forms in accordance with test specifications approved by the Joint Commission. As a preliminary step, examination forms are psychometrically assembled by Department of Testing Services staff so they are in accordance with test specifications and provide a reasonable psychometric starting point for TCTs. This occurs before the TCT meets. This TCT confirms the appropriateness of examination items in accordance with clinical relevance and basic principles of test form construction (e.g., ensuring that items that evaluate identical concepts do not appear on the same examination form). This TCT is responsible for final categorization and tagging of items relative to the Joint Commission's Domain of Dentistry and test specifications, and in support of the general needs of the INBDE Program. This TCT consists of the following:

- (5) General Dentists, each of whom must have attended at least one of the following:
 - a. Item Writing and Review meeting
 - b. Case Development meeting

All members of this TCT must have previously served on a TCT. One individual on the Clinical Relevance Review TCT must also be a content expert.

Form Review (5)

This TCT provides a final review of INBDE items, images, and forms, with respect to clinical relevance and the activities of a practicing general dentist. The TCT also determines the order of item sets when appropriate. This TCT consists of the following:

- (1) General Dentist
- (1) Subject Matter Expert from Diagnosis and Treatment Planning TCT Section
- (1) Subject Matter Expert from Oral Health Management TCT Section
- (1) Subject Matter Expert from Practice and Profession TCT Section
- (1) Determined by staff, existing TC with experience on a TCT

Each of the five TCs in the Form Review TCT are selected from either a) an Item Writing and Review TCT, or b) the Case Development TCT.

CRITERIA FOR DENTAL HYGIENE TEST CONSTRUCTORS

The National Board Dental Hygiene Examination is constructed by teams of consultants with subject matter expertise in the following eight areas.

Biomedical Sciences

The biomedical sciences include anatomy, histology, biochemistry and nutrition, physiology, microbiology and immunology, pathology, pharmacology, and oral biology.

- a. Doctoral degree in a biomedical science, or a dentist or dental hygienist with advanced education in a related biomedical or related dental science beyond what was provided in the entry level dental hygiene education.
- b. At least three years' experience within the last five years teaching a biomedical or dental science to dental hygiene students.

Radiology

- a. Dentist or dental hygienist with a baccalaureate degree from an accredited program.
- b. An oral and maxillofacial radiologist or a dental hygienist with formal education in dental radiology beyond what was provided in dental hygiene program.
- c. At least three years' experience within the last five years teaching radiology.

Periodontics – Periodontist

- a. Graduate of an accredited dental program with advanced formal education in periodontics.
- b. At least three years' experience within the last five years teaching or practicing periodontics.

Periodontics – Dental Hygienist

- a. Graduate of an accredited dental hygiene program with advanced clinical experience or education in periodontics.
- b. At least three years' experience within the last five years teaching periodontics.

Oral Medicine/Oral Diagnosis/Oral Pathology

- a. Dentist or dental hygienist with advanced education or experience.
- b. At least three years of experience within the last five years teaching oral medicine/oral diagnosis/oral pathology.

Special Needs Professional

- a. Dentist or dental hygienist with advanced clinical experience or education with special needs populations.
- b. At least three years of experience within the last five years teaching a relevant subject area.

Dental Hygiene Curriculum

- a. Dental hygienist who has graduated from an accredited program.
- b. Advanced degree, preferably in dental hygiene.
- c. Experience in curriculum design as a dental hygiene program director, member of a dental hygiene curriculum committee, or accreditation consultant for dental hygiene.
- d. At least three years' experience within the last five years clinical teaching with a preference for experience practicing clinical dental hygiene full-time or part-time in private or faculty practice.

Clinical Dental Hygiene

- a. Dental hygienist who has graduated from an accredited program.
- b. Baccalaureate degree in dental hygiene, education, or a biomedical science.
- c. At least three years' experience within the last five years teaching or practicing clinical dental hygiene; full-time or part-time in private practice or faculty practice.

Community Dental Health

- a. Dentist or dental hygienist who has graduated from an accredited program.
- b. Advanced education in public health or related field; degree preferred.
- c. At least three years' experience within the last five years teaching public health or community dental health with a preference for public health experience .

Dental Hygiene Test Construction Teams

Three dental hygiene Component A teams (total of 15 members) and the dental hygiene Component B team (8 members) construct the National Board Dental Hygiene Examination.

Component A Teams

Dental Hygiene I

- a. Biomedical science experts (3)
- b. Dental hygiene curriculum expert (1)

Dental Hygiene II

- a. Periodontists (3), at least one must be a periodontist
- b. Dental hygiene curriculum expert (1)
- c. Clinical dental hygiene experts (2)
- d. Oral and Maxillofacial Radiologist or dental hygienist with formal education in radiology (1)

Dental Hygiene III

- a. Dental Hygiene Curriculum expert (1)
- b. Clinical Dental Hygiene expert (1)
- c. Community Dental Health experts (2)

Component B Team

Component B

- a. Biomedical science expert (1)
- b. Dental hygiene curriculum expert (1)
- c. Clinical dental hygiene expert (1)
- d. Community dental health expert (1)
- e. Oral medicine/oral diagnosis expert (1)
- f. Periodontist (1)
- g. Oral and Maxillofacial radiologist or dental hygienist with formal education in radiology (1)
- h. Special needs expert (1)

Case Selection

Individuals from various dental hygiene disciplines (4)

Consultant Review

Individuals from the various dental hygiene disciplines, one of whom must be a dentist (4)

Individuals serving on Component B, Case Selection, and/or Consultant Review teams should have already served on Dental Hygiene Component A.
