

ADA Science and Research Institute

Preble, Dave, interim chief executive officer and
sole manager

Update of the status of ADASRI since the report to the 2023 House of Delegates

The plan, as of last year, was to change the ADASRI LLC to a 501(c)(3) charitable corporation. Instead of changing the status of ADASRI, an exciting opportunity was presented to bring ADASRI together with the Forsyth Institute, which is already a 501(c)(3), to create the premier oral health research entity. That has become a reality, forming the ADA Forsyth Institute (AFI). A separate report will be presented by AFI.

The ADASRI Board has been dissolved and a new Board was formed for AFI, initially comprised of members from the former ADASRI Board and the former Forsyth Institute Board. The remaining work of ADASRI will be to transfer assets to ADA Forsyth and relocate personnel for the research that will continue under AFI, in Boston. Full transfer of operations from Chicago, Maryland and National Institute of Standards and Technology (NIST) is expected to be completed by the end of 2024.
