DQA Measure Specifications: Administrative Claims-Based Measures

Follow-up after Emergency Department Visits for Non-Traumatic Dental Conditions in Adults

Description: The percentage of ambulatory care sensitive non-traumatic dental condition emergency department visits among adults aged 18 years and older in the reporting period for which the member visited a dentist within (a) 7 days and (b) 30 days of the ED visit

Numerators: Number of ambulatory care sensitive non-traumatic dental condition ED visits in the reporting period for which the member visited a dentist within (a) 7 days (NUM1) and (b) 30 days (NUM2) of the ED visit

Denominator: Number of ambulatory care sensitive non-traumatic dental condition ED visits in the reporting period

Rates: NUM1/DEN and NUM2/DEN

Rationale: The use of emergency departments (EDs) for non-traumatic dental conditions has been a growing public health concern across the United States (US)^{1,2,3,4,5,6,7,8} with over 2 million visits occurring in 2015.⁹ The majority of ED visits are semi-urgent (53.8%) or non-urgent (23.9%)¹⁰, which can be better managed in an ambulatory care setting. Dental care in an ED setting is not definitive with limited care continuity that ultimately leads to poor oral health outcomes.^{11,12,13} This process of care measure can be used to assess if the patient had timely follow-up with a dentist for more definitive care.

National Quality Forum Domain: Process¹

Institute of Medicine Aims: Equity, Safety, Timeliness

National Quality Strategy Priority: Health and Wellbeing

Level of Aggregation: Program (NOTE: This measure only applies to programs such as Medicaid that provide both medical insurance and dental benefits. Use of this measure as a requirement for stand-alone dental benefit plans will result in feasibility issues due to lack of access to appropriate data. Use by health plans that provide both medical insurance and dental benefits to a population may be considered after assessment of data element feasibility within the plans' databases).

Improvement Noted As: A higher rate indicates better quality.

Data Required: Administrative enrollment and claims data (medical and dental); single year. When using claims data to determine service receipt, include only paid claims.

Measure Purpose: Examples of questions that can be answered through this measure at each level of aggregation:

1. What is the percentage of ED visits for ambulatory care sensitive non-traumatic dental conditions for which adults see a dentist for follow-up within 7 days and 30 days, respectively?
2. Does the percentage ambulatory care sensitive non-traumatic dental condition ED visits that are followed up by visit with a dentist within 7 days and 30 days, respectively, stay stable, increase or decrease over time?

Applicable Stratification Variables

1. Age: 18, 19-20, 21-24, 25-34, 35-44, 45-54, 55-64, 65-74, 75-84, 85 and above

Follow-up after Emergency Department Visit for Ambulatory Care Sensitive Non-Traumatic Dental Conditions Calculation:

1. Identify all emergency department visits for ambulatory care sensitive non-traumatic dental conditions occurring during eligible member months **between January 1 and December 1** of the reporting year:

Note: Exclude all member months (and associated claims in those months) in which an individual was eligible for both Medicare and Medicaid (i.e., "dual eligible").

- a. Identify a health care encounter as an ED visit if ANY of the following are met:
 - CPT codes 99281-99285 (ED visit for patient evaluation/management); **OR**
 - Revenue code 0450-0459 (Emergency Room) or 0981 (professional fees for ER services); **OR**
 - CMS place of service code for professional claims - 23 (Emergency Room)
- b. Exclude visits that result in inpatient admissions where inpatient admissions are identified as:
 - (i) the patient has an inpatient admission defined by UB Type of Bill = 11x OR 12x OR 41x

AND

 - (ii) that admission occurred within 48 hours:

[inpatient admit date] – [ED admit date] >= 0 days AND <= 2 days.
- c. Member must be >=18 years on date of visit

Reporting note: Age stratifications will be based on subject's age on date of ED visit.

- d. Identify an ED visit as being for an ambulatory care sensitive non-traumatic dental condition if:
 - i. any of the ICD-9-CM/ICD-10-CM diagnosis codes in Table 1 is listed as a FIRST-LISTED diagnosis code associated with the visit

OR

 - ii. (a) any of the ICD-9-CM/ ICD-10-CM diagnosis codes in Table 2 is listed as a FIRST-LISTED diagnosis **AND** (b) any of the ICD-9-CM/ ICD-10-CM diagnosis codes in Table 1 is listed as an ADDITIONAL LISTED diagnosis. (Codes from Table 2 must be accompanied by a code from Table 1 to qualify.)

- e. Member must be enrolled on date of ED visit and through 30 days following the visit.
- f. Count only one visit per member per day.
- g. Sum the number of ED visits for ambulatory care sensitive dental conditions.

YOU NOW HAVE THE DENOMINATOR: Number of ED visits for ambulatory care sensitive non-traumatic dental conditions

2. Check if subject had a visit with a dentist (dental service) within 30 days of the ED visit:
 - a. If [CDT CODE] = D0100 – D9999 (any dental service), AND;
 - b. [DATE OF ED VISIT]-[DATE OF DENTAL VISIT] <=30 days, AND;

Note: If two or more ambulatory care sensitive non-traumatic dental condition ED visits occur for the same member within 30 days of one another, then use the first ED visit as the index date for follow-up. Both ED visits will count in the denominator. A follow-up dental visit within 30 days of the first ED visit will be counted once in the numerator.

- c. If [RENDERING PROVIDER TAXONOMY] code = any of the NUCC maintained Provider Taxonomy Codes in Table 3 below,² then proceed to next step (#3).
- d. If a **AND** b **AND** c are not met, then the service was not a “follow-up dental service”; STOP processing.

Note: In this step, all **claims** with missing or invalid CDT CODE, missing or invalid NUCC maintained Provider Taxonomy Codes, or NUCC maintained Provider Taxonomy Codes that do not appear in Table 3 should be excluded.

YOU NOW HAVE NUMERATOR 2 (NUM2): ED visits for ambulatory care sensitive non-traumatic dental conditions for which the member had a visit with a dentist within 30 days

3. Among the ED visits identified in Step 3, check if the subject had a visit with a dentist (dental service) within 7 days of the ED visit: [DATE OF ED VISIT]-[DATE OF DENTAL VISIT] <=7 days

YOU NOW HAVE NUMERATOR 1 (NUM1): ED visits for ambulatory care sensitive non-traumatic dental conditions for which the member had a visit with a dentist within 7 days

4. Report
 - a. Unduplicated count of ambulatory care sensitive non-traumatic dental condition ED visits with 30-day dentist visit follow-up in numerator

² **Identifying “dental” services:** Programs and plans that do not use standard NUCC maintained provider taxonomy codes should use a valid mapping to identify providers whose services would be categorized as “dental” services. Stand-alone dental plans that reimburse ONLY for services rendered by or under the supervision of the dentist can consider all claims as “dental” services.

- b. Unduplicated count of ambulatory care sensitive non-traumatic dental condition ED visits with 7-day dentist visit follow-up in numerator
- c. Unduplicated count of ambulatory care sensitive non-traumatic dental condition ED visits in denominator
- d. Rates: (NUM1/DEN), (NUM2/DEN)
