

Dentist Migration Across State Lines

ABOUT 1 IN 13 DENTISTS (7.7%) moved to a different state between 2015 and 2020. Among dentists aged 40 or younger, about 1 in 6 (15.8%) migrated across state lines during this period, compared to 12.6% of younger dentists between 2011 and 2016.

DENTISTS OF ALL AGES

DENTISTS 40 AND UNDER

Note: Percentages in the figures refer to net migration of practicing dentists between December 2015 and December 2020 (i.e., the number of dentists who entered the state minus number of dentists who left the state) divided by the number of practicing dentists in the state in December 2015. Age is calculated as of December 2015. Sample includes all dentists in the United States who were practicing in both December 2015 and December 2020. Based on HPI analysis of the ADA masterfile.

Download the [detailed data](#) on the number of dentists migrating from each state to all 49 other states.
