

## Meet the ADA Dental Experience and Research Exchange (DERE)™ Dashboard

After successfully enrolling, each practice will have access to a personalized dashboard. Within this dashboard, a practice can:

- Get an overall snapshot of its patient and practice data
- Filter its data by Registered Provider and location
- Generate, visualize and analyze reports on specific quality measures that can help it:
  - Understand the completeness of patient records;
  - Assess procedure and population profiles;
  - Assess dental caries and periodontal disease prevention and disease management profile; and
  - Assess average charges and net revenue (after adjustments) per patient

See above for a sample report offered on the DERE dashboard and visit [ADA.org/DERE](https://ADA.org/DERE) to enroll today.
