THE NUMBER OF INTERNATIONAL DENTAL SCHOOL GRADUATES admitted to U.S. dental schools has generally increased since 1985. However, a substantial decrease occurred between 2013-14 and 2014-15, due largely to the phase out of an advanced standing program that admitted more than 120 international grads per year. In 2017-18, the number of international grads was the highest it has been in four years.
