The Commission on Dental Accreditation recognizes that students/residents may gain educational experiences in a variety of settings and locations.

An accredited program may use one or more than one setting or location to support student/resident learning and meet Commission on Dental Accreditation standards and/or program requirements. The Commission expects programs to follow the EOPP guidelines and accreditation standards when developing, implementing and monitoring activity sites used to provide educational experiences.

**Reporting Requirements:**
The Commission on Dental Accreditation must be informed when a program accredited by the Commission plans to initiate educational experiences in new settings and locations. Off-Campus training sites that are owned by the sponsoring institution do not need prior approval before utilization but must be reported to the Commission in accordance with the Policy on Reporting Program Changes in Accredited Programs.

*sites used for community service and service learning are exempt*

The Commission must ensure that the necessary education as defined by the standards is available, and appropriate resources (adequate faculty and staff, availability of patient experiences, and distance learning provisions) are provided to all students/residents enrolled in an accredited program. Generally, only programs without reporting requirements will be approved to initiate educational experiences at major activity sites.

When the Commission has received notification that an institution plans to offer its accredited program at an off-campus educational activity site, the Commission may conduct a special focused site visit to each educational activity site where each student’s/resident’s educational experience is provided, based on the specifics of the program, the accreditation standards, and Commission policies and procedures, or if other cause exists for such a visit as determined by the Commission. There may be extenuating circumstances when a special review is necessary.

The program must report the rationale for adding an educational activity site and how that site affects the program’s goals, objectives, and outcomes. For example, program goals, objectives, and outcome measures may address institutional support, faculty support, curriculum, student didactic and clinical learning, research, and community service. The program must support the addition of an educational activity site with trends from pertinent areas of its outcomes assessment program that indicates the rationale for the additional site.

When conducting a review of the program, the Commission’s site visit team will identify the sites to be visited based upon educational experiences at the site (for example based upon length of
training at the site, educational experience or evaluation/competencies achieved). After the initial visit or review, each educational activity site may be visited during the regularly scheduled CODA evaluation visit to the program.

**Discipline-specific Exemptions:**
The Commission recognizes that dental assisting and dental laboratory technology programs utilize numerous extramural private dental offices and laboratories to provide students with clinical/laboratory work experience. The program will provide a list of all currently used extramural sites in the self-study document. The Commission will then randomly select and visit facilities at the time of a site visit to the program. Prior Commission approval of these extramural dental office and laboratory sites will not be required.

The Commission recognizes that dental public health programs utilize numerous off-campus sites to provide students/residents with opportunities to conduct their supervised field experience. The program will provide a list of all currently used sites in the self-study document. The visiting committee will select and visit facilities during the site visit to the program to evaluate compliance with CODA accreditation standards. Prior Commission approval of these supervised field experience sites will not be required. Programs where 30% or more of the overall student/resident training occurs at off-campus site(s) must report the off-campus site(s) under the Commissions Policy Statement on Approval of Sites Where Educational Activity Occurs.

The Commission recognizes that advanced general dentistry education programs in dental anesthesiology utilize numerous mobile ambulatory settings and rotations to provide residents with opportunities to gain required clinical experiences. The program will provide a list of all currently used settings and rotations in the self-study document. The visiting committee will randomly select and visit several settings and rotation locations during the site visit to the program to evaluate compliance with Commission on Dental Accreditation standards. Prior Commission approval of these settings and rotations will not be required.

For predoctoral dental education programs, when primary program faculty travel with student(s) to a site and competency is assessed, the site may be treated as a minor site for reporting purposes.

Expansion of a developing dental hygiene program and/or current or developing dental assisting program will only be considered after the program has demonstrated success by graduating the first class, measured outcomes of the academic program, and received approval without reporting requirements.

**Fees Related to the Use of Educational Activity Sites:**
All programs accredited by the Commission pay an annual fee. Additional fees will be based on actual accreditation costs incurred during the visit to and educational activity site. The Commission office should be contacted for current information on fees.

**Commission on Dental Accreditation Consideration of Educational Activity Sites:**
The Commission uses the following process when considering reports for adding educational activity sites. Program administrators have the option of consulting with Commission staff at any time during this process.
1. Depending upon the type of educational activity site established, a program administrator submits either: (1) the major educational activity site report by June 1 or December 1 or (2) the minor educational activity site report at least thirty (30) days prior to planned implementation of educational activity site.

2. Commission staff reviews the report to assess its completeness and to determine whether the change could impact the program’s potential ability to comply with the accreditation standards. If this is the case, the report is reviewed by the appropriate Review Committee for the discipline and by the Commission.

3. Receipt of the educational activity site report and accompanying documentation is acknowledged in one of the following ways:
   a. The program administrator is informed that the report will be reviewed by the appropriate Review Committee and by the Commission at their next regularly scheduled meeting. Additional information may be requested prior to this review if the change is not well-documented; or
   b. The program administrator is informed that the reported change will be reviewed during the next site visit.

4. If the report will be considered by a Review Committee and by the Commission, the report is added to the appropriate agendas. The program administrator receives notice of the results of the Commission’s review.

The following alternatives may be recommended by Review Committees and/or be taken by the Commission in relation to the review of reports of addition of educational activity sites received from accredited educational programs.

- **Approve the addition of the educational activity site**: If the Review Committees or Commission does not identify any concerns regarding the program’s continued compliance with the accreditation standards, the transmittal letter should advise the institution that the change has been noted and will be reviewed at the next regularly-scheduled site visit to the program.

- **Approve the addition of the educational activity site and request additional information**: If the Review Committees or Commission does not identify any concerns regarding the program’s compliance with the accreditation standards, but believes follow up reporting is required to ensure continued compliance with accreditation standards, additional information will be requested for review by the Commission. Additional information could occur through a supplemental report or a focused site visit. Use of the educational site is permitted.

- **Postpone action and continue the program’s accreditation status, but request additional information**: The transmittal letter will inform the institution that the report of the addition of the educational activity site has been considered, but that concerns regarding continued compliance with the accreditation standards have been identified. Additional specific information regarding the identified concerns will be requested for review by the Commission. The institution will be further advised that, if the additional information submitted does not satisfy the Commission regarding the identified concerns, the Commission reserves the right to request additional documentation, conduct a special focused site visit of the program, or deny the request. Use of the educational activity site is not permitted until Commission approval is granted.
• *Deny the request:* If the submitted information does not indicate that the program will continue to comply with the accreditation standards, the Commission will deny the request for the addition of educational activity sites. The institutions will be advised that they may re-submit the request with additional information if they choose.

Adopted: 2/16 (Former Off-Campus Policy)
